The products currently we can provide contains over 250 models. Besides this, our R&D team is consisting of more than 200 experienced engineers and they continue to develop more than 30 brand new products for the customers every year. We are looking for starting the cooperation with you!

BRAND STORY · A BRAND OF JWD

The TEMKONG Story

TEMKONG is a consumer electronics brand under JWD, built on a simple belief: reliable, well-designed technology should be accessible to everyone. JWD’s years of experience in research, development, and manufacturing gave rise to TEMKONG—a brand dedicated to bringing quality digital products to homes and offices worldwide.

Our name reflects our philosophy. “TEM” stands for technology, efficiency, and modernity, while “KONG” represents strength, reliability, and a solid foundation. Together, they embody our commitment to building products that are powerful, dependable, and easy to use.

From tablets and laptops to AI voice recorders, every TEMKONG product balances performance, aesthetics, and value. We focus on smart engineering and efficient production to deliver exceptional quality without a premium price. Whether you are a student, a professional, or a creator, our products are designed to fit seamlessly into your daily life—with crisp displays, comfortable keyboards, long battery life, and intuitive features.

As a JWD brand, we are backed by global resources, rigorous quality control, and a passionate team of engineers and designers. Every product we release is a promise of durability, performance, and thoughtful design.

Looking ahead, TEMKONG will continue to expand its portfolio and push the boundaries of consumer electronics. We invite you to experience technology that is smart, stylish, and within reach.

Welcome to TEMKONG, where innovation meets everyday life.

Recording Card Q&A

Cloud & AI · Connectivity · SDK · Files · Security

Cloud & AI

- What cloud service is used?**

Alibaba Cloud / Microsoft Azure
- What large language model is used?**

ChatGPT / Microsoft Azure OpenAI
- How many languages are supported for transcription?**

118 languages
- Does transcription run on the device, or on your server? If on your server, what is the cost per minute and is there a free tier?**

Transcription runs on the server. It is free for the first year; from the second year onward, 300 minutes per month are included free of charge, and usage beyond the quota requires a subscription.
- What if your service shuts down — does the card become a brick?**

It can still be used for offline recording.

No

Connectivity & Transfer

- Does the BLE protocol support file listing?**

Yes
- Does the BLE protocol support audio file download?**

Yes
- Can the app control the device to start/stop recording?**

Yes
- What is the actual BLE transfer speed in KB/s or MB/min?**

Android phones: 50–100 KB/s; iOS phones: 50 KB/s · Bluetooth transfer: 67–92 KB/s · Wi-Fi transfer: 880–1600 KB/s
- Can the app resume an interrupted file transfer?**

Yes

Not seeing your question?

Our solutions team can walk you through the full technical datasheet, OEM program and sample units.

SDK & Integration

- Please confirm whether you support an open API and iOS/Android SDK for third parties?**

Yes
- Is a firmware SDK available?**

No
- Can we use the SDK in our own commercial app?**

Yes
- Can a third-party/custom app connect directly to the recorder?**

Only a compatible dedicated app can connect to the device.

No
- Can the device work fully without your cloud?**

Yes
- Can we disable your app/cloud and use only our backend?**

Yes
- Is it possible to have white-label firmware built to our specifications?**

Yes

Files & Storage

- What file formats can be downloaded: WAV, OPUS, MP3, M4A?**

D2/R2/AP1 models: MP3; R5/R7 series and A7: WAV/OPUS; other series: OPUS
- What is the average file size for 1 hour of recording?**

Approximately 14 MB for MP3, 100 MB for WAV, and 14 MB for OPUS.
- Can recordings be deleted from the device after download?**

Yes
- Are local recording and call recording automatically distinguished?**

D2 model: distinguished by a button press; other models: automatically distinguished by algorithm

Security & Compliance

- Is the product GDPR compliant?**

Yes
- Are customers allowed to control firmware signing and secure boot?**

No
- Are customers allowed to use OTA updates and encrypt recording data? Who holds the OTA signing key.**

The OTA upgrade permission for the customer's own app is controlled by the customer.

Yes
